

Respond to Trip Offer Requirements Spec

1. Respond to Trip Offer

ID: UC07

Primary Actors	 External Driver - Supplier
Level	N/A
Complexity	N/A
Use Case Status	N/A
Implementation Status	N/A
Preconditions	1. Driver received a WhatsApp message containing a confirmation link. 2. The confirmation link is still valid. 3. The offered trip(s) are still in "Pending Approval" status.
Post-conditions	1. Accepted trips are updated to status "Assigned." 2. Ride Control System is updated for each accepted trip. 3. Driver received a WhatsApp confirmation for accepted trips. 4. Rejected trips are forwarded to the next available driver in the ranked list.
Author	Dan
Assumptions	N/A

1.1. Requirements

Name	ID	Kind
 F15 Per-Trip Approve / Reject – Driver can approve some trips and reject others individually.	UC07.REQ002	
 F14 Mobile Trip Approval Page – Hebrew interface, mobile -friendly, displaying all offered trips for the driver to review.	UC07.REQ001	
 F17 Send Confirmation to Driver – "Confirmed! Thank you !" WhatsApp message after successful approval.	UC07.REQ003	
 F20 AI Interpretation of WhatsApp Replies – AI identifies driver intent (approve / reject / availability change) from a free-text reply.	UC07.REQ004	
 F21 Update Driver Availability from WhatsApp – When a driver writes "off tomorrow" the system automatically updates their availability.	UC07.REQ005	

1.2. Scenarios

1.2.1. MSS

1. Driver receives a WhatsApp message with trip details and a confirmation link
2. Driver opens the confirmation link.
3. System validates the link.
4. System verifies the offered trips are still pending and have not been assigned to another driver.
5. Confirmation page loads, displaying each offered trip with: time, pickup address, destination, and number of passengers.
6. Driver reviews each trip individually and selects "Accept" or "Cannot" for each one.
7. System saves the driver's selections.

8. For each accepted trip: status is updated to "Assigned" and Ride Control is updated (triggers Update Ride Control).
9. Driver receives a WhatsApp confirmation: "Confirmed! Thank you."
10. For each rejected trip: offer is automatically forwarded to the next driver in the ranked list.

1.2.2. Extensions

1. 3a. Link is invalid → Page displays "Invalid link" message; session ends.
2. 3b. Link has expired → Page displays "This link is no longer active" message; session ends.
3. 4a. Trip already assigned to another driver → Page displays "This offer is no longer available."
4. 6a. Driver rejects all trips → All trips forwarded to next driver; Dispatcher notified if no drivers remain in the list. <<Extend >> Forward Offer to Next Driver — triggered when driver selects "Cannot" for a trip or fails to respond within the allowed time.

1.2.3. Notes

1. Driver may accept some trips and reject others in the same session; each decision is handled independently. A supplier receiving a batch may accept on behalf of their drivers and internally redistribute the trips.
